Indications and Important Safety Information

IMPORTANT SAFETY INFORMATION FOR ALL ACUVUE® BRANDS (Except ACUVUE® VITA, 1-DAY ACUVUE® DEFINE® and ACUVUE® 2 COLOURS)

Important Information for contact lens wearers: ACUVUE® Brand Contact Lenses are available by prescription only for vision correction. An eye doctor will determine whether contact lenses are right for you.

How should I use my lenses? Follow the wear and replacement schedule and the lens care instructions provided by your eye doctor.

Are there any risks with wearing contact lenses? Although rare, serious eye problems can develop while wearing contact lenses. Therefore, it is important to talk to your eye doctor about proper wear and care of your lenses.

Who should not wear contact lenses? Only your eye doctor can determine if contact lenses are right for you. If your eye doctor has prescribed contact lenses for you, you should not wear them if you have an eye infection, or experience eye discomfort, excessive tearing, vision changes, redness or other eye problems. If one of these conditions occurs, contact your eye doctor immediately.

Where can I obtain more information about ACUVUE® Brand Contact Lenses? For more information on proper wear, care and safety, talk to your eye doctor, call 1-800-843-2020 or download the [Patient Instruction Guides](#).

IMPORTANT SAFETY INFORMATION FOR ACUVUE® VITA BRAND CONTACT LENSES

Important Information for contact lens wearers: ACUVUE® VITA Brand Contact Lenses are available by prescription only for vision correction as a daily wear lens with one-month recommended replacement. An eye doctor will determine whether contact lenses are right for you.

How should I use my lenses? Follow the wear and replacement schedule and the lens care instructions provided by your eye doctor.

Are there any risks with wearing contact lenses? Although rare, serious eye problems can develop while wearing contact lenses. To help avoid these problems, follow the wear and replacement schedule and lens care instructions provided by your eye doctor.

Who should not wear contact lenses? Only your eye doctor can determine if contact lenses are right for you. If your eye doctor has prescribed contact lenses for you, you should not wear them if you have an eye infection, or experience eye discomfort, excessive tearing, vision changes, redness or other eye problems. If one of these conditions occurs, remove the lens and contact your eye doctor immediately.

Where can I obtain more information about ACUVUE® Brand Contact Lenses? For more information on proper wear, care and safety, talk to your eye doctor, call 1-800-843-2020 or download the [Patient Instruction Guides](#).

IMPORTANT SAFETY INFORMATION FOR 1-DAY ACUVUE® DEFINE® BRAND CONTACT LENSES

Important Information for contact lens wearers: 1-DAY ACUVUE® DEFINE® Brand Contact Lenses are available with and without vision correction. An eye care professional will determine whether contact lenses are right for you.

How should I use my lenses? Follow the wear and replacement schedule and the lens care instructions provided by your eye doctor.

Are there any risks with wearing contact lenses? Although rare, serious eye problems can develop while wearing contact lenses. Therefore, it is important to talk to your eye doctor about proper wear and care of your lenses.

Who should not wear contact lenses? Only your eye doctor can determine if contact lenses are right for you. Once you have your contact lenses, do not wear them if you have an eye infection, or experience eye discomfort, excessive tearing, vision changes, redness or other eye problems. If one of these conditions occurs, contact your eye doctor immediately.

Can a friend wear my contact lenses? No, you should never let anyone else wear your lenses for two reasons. If you share the same lenses, it can increase your risk of getting an eye infection. In addition, only an eye doctor can determine if the lenses are right for your friend.

Where can I obtain more information about ACUVUE® Brand Contact Lenses? For more information on proper wear, care and safety, talk to your eye doctor, call 1-800-843-2020 or download the [Patient Instruction Guides](#).

IMPORTANT UV INFORMATION

*Helps protect against transmission of harmful UV radiation to the cornea and into the eye.

WARNING: UV-absorbing contact lenses are NOT substitutes for protective UV-absorbing eyewear such as UV-absorbing goggles or sunglasses because they do not completely cover the eye and surrounding area. You should continue to use UV-absorbing eyewear as directed. NOTE: Long-term exposure to UV radiation is one of the risk factors associated with cataracts. Exposure is based on a number of factors such as environmental conditions (altitude, geography, cloud cover) and personal factors (extent and nature of outdoor activities). UV-blocking contact lenses help provide protection against harmful UV radiation. However, clinical studies have not been done to demonstrate that wearing UV-blocking contact lenses reduces the risk of developing cataracts or other eye disorders. Consult your eye care practitioner for more information.
