

History of ACUVUE® Brand

Since 1987, ACUVUE® has been on the forefront of research, development and manufacturing to provide contact lens wearers with a portfolio of advanced technologies that deliver superior comfort and exceptional performance. With origins as the world's first mass-marketed disposable soft contact lenses, today ACUVUE® serves over 50 million patients in more than 103 countries.¹

4 billion ACUVUE® Brand Contact Lenses are made annually¹

 1-DAY ACUVUE® MOIST Brand is the **#1** daily disposable contact lens⁴

 ACUVUE OASYS® Brand is the **#1** selling contact lens brand³

ACUVUE® Most trusted brand by eye care professionals globally⁴

- 1508** Leonardo da Vinci first illustrates the concept of contact lenses.⁵
- 1823** British astronomer Sir John Herschel conceptualizes practical lens design.⁵
- 1887** German glassblower F.A. Muller produces the first glass contact lenses that are designed to cover the whole eye, but lack comfort.⁶
- 1930** A more eye-friendly contact lens is introduced with the invention of Plexiglas; however, they still block oxygen flow to the eyes.⁵
- 1936** New York optometrist Willian Feinbloom introduces hard plastic contact lenses, which are made from a combination of glass and plastic.⁶
- 1948** California optician Kevin Tuohy produced the first corneal contact lenses, which were made entirely of plastic and more closely resemble modern lenses of today.⁶

- 1959** Johnson & Johnson Vision Care, Inc. (JJVCI) begins as Frontier Contact Lenses in Buffalo, New York before eventually relocating to Jacksonville, Florida a few years later.⁷
- LATE 1960'S** The invention of hydrogel revolutionizes contact lens technology,⁵ improving lens comfort.⁸
- 1981** Johnson & Johnson acquires Frontier.⁷
- 1987** JJVCI transforms the eye care industry by introducing the world's first disposable soft contact lenses under the name ACUVUE® Brand Contact Lenses.⁷
- 1991** JJVCI breaks into the global market by opening an operating group in Tokyo, Japan before expanding to five continents within the year.⁷
- 1993** ACUVUE® gains global recognition, becoming the #1 most prescribed contact lens brand in the world.⁷
The same year, JJVCI revolutionizes its product portfolio by launching 1-DAY ACUVUE® Brand Contact Lenses, providing superior comfort and convenience with the world's first daily disposable contact lens.⁷

*All ACUVUE® Brand Contact Lenses have Class 1 or Class 2 UV-blocking to help provide protection against transmission of harmful UV radiation to the cornea and into the eye. UV-absorbing contact lenses are NOT substitutes for protective UV-absorbing eyewear such as UV-absorbing goggles or sunglasses because they do not completely cover the eye and surrounding area.
**JJVC Data on file 2013. †Helps protect against transmission of harmful UV radiation to the cornea and into the eye. ‡UVB and UVA blocking percentages are taken on average across the wave length.

Our Commitment To Innovation And Growth Continues As We Look To The Future

421 patents filed
over the last
5yrs¹¹

Committed to bringing
2 new products to
market annually
through **2020**¹²

Indications and Important Safety Information

IMPORTANT SAFETY INFORMATION FOR ALL ACUVUE® BRANDS (Except ACUVUE® VITA, 1-DAY ACUVUE® DEFINE® and ACUVUE® 2 COLOURS)

Important Information for contact lens wearers: ACUVUE® Brand Contact Lenses are available by prescription only for vision correction. An eye doctor will determine whether contact lenses are right for you.

How should I use my lenses? Follow the wear and replacement schedule and the lens care instructions provided by your eye doctor.

Are there any risks with wearing contact lenses? Although rare, serious eye problems can develop while wearing contact lenses. Therefore, it is important to talk to your eye doctor about proper wear and care of your lenses.

Who should not wear contact lenses? Only your eye doctor can determine if contact lenses are right for you. If your eye doctor has prescribed contact lenses for you, you should not wear them if you have an eye infection, or experience eye discomfort, excessive tearing, vision changes, redness or other eye problems. If one of these conditions occurs, contact your eye doctor immediately.

Where can I obtain more information about ACUVUE® Brand Contact Lenses? For more information on proper wear, care and safety, talk to your eye doctor, call 1-800-843-2020 or download the [Patient Instruction Guides](#).

IMPORTANT SAFETY INFORMATION FOR ACUVUE® VITA BRAND CONTACT LENSES

Important Information for contact lens wearers: ACUVUE® VITA Brand Contact Lenses are available by prescription only for vision correction as a daily wear lens with one-month recommended replacement. An eye doctor will determine whether contact lenses are right for you.

How should I use my lenses? Follow the wear and replacement schedule and the lens care instructions provided by your eye doctor.

Are there any risks with wearing contact lenses? Although rare, serious eye problems can develop while wearing contact lenses. To help avoid these problems, follow the wear and replacement schedule and lens care instructions provided by your eye doctor.

Who should not wear contact lenses? Only your eye doctor can determine if contact lenses are right for you. If your eye doctor has prescribed contact lenses for you, you should not wear them if you have an eye infection, or experience eye discomfort, excessive tearing, vision changes, redness or other eye problems. If one of these conditions occurs, remove the lens and contact your eye doctor immediately.

Where can I obtain more information about ACUVUE® Brand Contact Lenses? For more information on proper wear, care and safety, talk to your eye doctor, call 1-800-843-2020 or download the [Patient Instruction Guides](#).

IMPORTANT SAFETY INFORMATION FOR 1-DAY ACUVUE® DEFINE® BRAND CONTACT LENSES

Important Information for contact lens wearers: 1-DAY ACUVUE® DEFINE® Brand Contact Lenses are available with and without vision correction. An eye care professional will determine whether contact lenses are right for you.

How should I use my lenses? Follow the wear and replacement schedule and the lens care instructions provided by your eye doctor.

Are there any risks with wearing contact lenses? Although rare, serious eye problems can develop while wearing contact lenses. Therefore, it is important to talk to your eye doctor about proper wear and care of your lenses.

Who should not wear contact lenses? Only your eye doctor can determine if contact lenses are right for you. Once you have your contact lenses, do not wear them if you have an eye infection, or experience eye discomfort, excessive tearing, vision changes, redness or other eye problems. If one of these conditions occurs, contact your eye doctor immediately.

Can a friend wear my contact lenses? No, you should never let anyone else wear your lenses for two reasons. If you share the same lenses, it can increase your risk of getting an eye infection. In addition, only an eye doctor can determine if the lenses are right for your friend.

Where can I obtain more information about ACUVUE® Brand Contact Lenses? For more information on proper wear, care and safety, talk to your eye doctor, call 1-800-843-2020 or download the [Patient Instruction Guides](#).

IMPORTANT UV INFORMATION

*Helps protect against transmission of harmful UV radiation to the cornea and into the eye.

WARNING: UV-absorbing contact lenses are NOT substitutes for protective UV-absorbing eyewear such as UV-absorbing goggles or sunglasses because they do not completely cover the eye and surrounding area. You should continue to use UV-absorbing eyewear as directed. NOTE: Long-term exposure to UV radiation is one of the risk factors associated with cataracts. Exposure is based on a number of factors such as environmental conditions (altitude, geography, cloud cover) and personal factors (extent and nature of outdoor activities). UV-blocking contact lenses help provide protection against harmful UV radiation. However, clinical studies have not been done to demonstrate that wearing UV-blocking contact lenses reduces the risk of developing cataracts or other eye disorders. Consult your eye care practitioner for more information.
